Education

University of Colorado at Boulder

August 2005 – May 2008

- B.A. in Communications – Emphasis on technology, marketing, and interpersonal communication

Web Development, Algorithm, and Data Structure

June 2016 – August 2016

Foundations - Firehose Project

In an immersive 24-week program I learned how to become a self-sufficient programmer able to break down complex problems into manageable pieces. I learned how to use cutting-edge technologies & frameworks, while keeping in mind best practices so that my code is easily maintainable

- Learned how to build-out basic CRUD Rails-apps following standard Rails conventions (without scaffolding), involving mailers, validations, image/video uploading on AWS S3, and nested RESTful routes
- Implemented Rspec for both unit and functional tests
- Worked through traditional computer science algorithms and data structures challenges
